(27)	Private Clubs with Recreational Facilities	\$298.32/increment of 74,095 gals. of water

ALTERNATIVE RATE:

The above rates are minimum rates. As an alternative rate, the District shall charge a higher rate for any user that discharges wastewater in excess of its annual allocation by applying the following formulas:

$$\text{Annual Allocation} = 74,095 \text{ gallons} \times \frac{\text{fixed minimum annual rate}}{\$298.32}$$

(\$298.32) = Annual rate of 1 Single Family Residence

$$\text{Alternative Charge} = \frac{\text{actual annual discharge in gallons}}{\text{annual allocation in gallons}} \times \text{minimum annual rate}$$
